Full-stack developer specialized in React, with 5+ years building high-quality, performant web applications end-to-end. Detail-obsessed and effective in fast-paced teams — equally at home leading front-end architecture or shipping across the stack.

01 EXPERIENCE

Fullstack Developer — National Shunt Service Ltd

PRESENT May 2025 – Now

- Lead development of the company's web platform, owning the React front end and integrating it with Node/SQL back-end services.
- Ship features end-to-end — from requirements and UI design through deployment — turning operational workflows into fast, responsive interfaces.
- Raise code quality and delivery speed through reusable components, code review, and incremental refactoring of legacy code.

Frontend Technical Team Lead — Vosyn

Sep 2023 – May 2024

- Led and mentored a team of developers building an AI-driven video platform in React, setting standards for UI design and interaction.
- Integrated front-end components with back-end services and drove modern frontend practices, improving application performance and engagement.

Pipeline Technical Developer — Monster Aliens Robots & Zombies

Sep 2022 – Jun 2023

- Engineered software scripts optimizing the animation and VFX pipeline, improving turnaround times and output quality.
- Built cross-departmental tooling into a unified workflow and resolved complex pipeline issues to keep production running.

Full-Stack Web Developer — University of Ottawa

Apr 2020 – Sep 2023

- Designed and implemented high-performance web solutions aligned with business objectives and client specifications.
- Ran code reviews and debugging, and built React interfaces deployed on AWS with RESTful API integration.
